PROFESSIONAL SUMMARY

Software Engineer and Full Stack Developer with hands-on experience building scalable MERN stack (MongoDB, Express.js, React.js, Node.js) and Python applications. Skilled in RESTful API design, JWT authentication, RBAC, and MVC architecture. Experienced in Machine Learning and data visualization using Pandas, Scikit-learn, Power BI, and SQL. Seeking Software Engineer, SDE, Full Stack Developer, Data Analyst, or AI/ML internship roles.

EDUCATION

Shri Ramswaroop Memorial University

B.Tech, Computer Science and Engineering (Data Science & AI) – CGPA: 8.14/10

Lucknow, India

2023 – Present

Silver Stone Public School

Senior Secondary (Class XII – PCM) – 76.70%

Chandausi, India

2022 – 2023

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+), SQL

Frameworks & Libraries: React.js, Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL, PostgreSQL

Developer Tools: Git, GitHub, Postman, JWT, Cloudinary, VS Code

Cloud & Deployment: Vercel, Render, CI/CD Basics

Data Science: Pandas, NumPy, Data Cleaning, Feature Engineering, Data Analysis

AI/ML: Scikit-learn, Machine Learning, Model Evaluation

Data Visualization: Power BI, Excel, Matplotlib, Seaborn

EXPERIENCE

Artificial Intelligence Intern

July 2025 – Aug 2025

Codec Technologies India

Remote

- Engineered data preprocessing and feature engineering pipelines in Python using Pandas and NumPy to prepare datasets for Machine Learning model training.
- Built and evaluated predictive models with Scikit-learn, applying model evaluation techniques to improve prediction accuracy on AI-driven projects.
- Analyzed structured datasets to extract actionable insights, following industry-standard data analysis and AI development best practices.

Generative AI Virtual Intern

June 2026 – Present

IBM SkillsBuild (via Edunet Foundation)

Remote

- Completed a structured virtual internship covering Generative AI, Large Language Models (LLMs), and Prompt Engineering fundamentals.
- Designed and tested hands-on AI projects, applying prompt engineering techniques, model evaluation, and responsible AI practices.

PROJECTS

InventoryPro – Inventory Management System | MongoDB, Express.js, React.js, Node.js, JWT

GitHub

- Developed a full-stack MERN inventory management system with JWT authentication and role-based access control (RBAC) across Admin and Staff permission levels.
- Designed and implemented 60+ RESTful API endpoints across 10 route modules following MVC architecture, backed by 5 MongoDB data models supporting products, billing, staff, and activity tracking.
- Built CRUD operations, low-stock alerts, barcode scanning, and an interactive analytics dashboard with real-time updates, search, and filtering for a responsive user experience.

Global Energy Analyzer | Python, Pandas, Scikit-learn, Streamlit

GitHub

- Built an end-to-end data analytics platform analyzing energy consumption and CO2 emission trends across 176 countries using a 3,649-row dataset spanning 2000–2020.
- Trained and benchmarked Random Forest and XGBoost regression models with Scikit-learn, achieving a test R^2 of 0.996 and reducing prediction error (MAE) to ~7,400 against a target range of 0–10.7M.
- Deployed an interactive Streamlit dashboard for data visualization, enabling users to explore CO2 trends and forecasts without writing code.

CERTIFICATIONS

Full Stack Web Development Bootcamp – L&T EduTech | Data Analytics and Reporting – IBM | SQL for Data Analytics – L&T EduTech

LEADERSHIP & EXTRACURRICULAR

- Technical Head, College Technical Club** – Led hands-on workshops and hackathons, mentoring 20+ students in Python and web development fundamentals.
- College Event Coordinator** – Organized university-level technical events, including coding competitions and tech fests, coordinating logistics for multiple student teams.
